## To The Public.

WE wish to thank the business houses of Crisfield for the co-operation they have given us in our efforts to issue a "Souvenir to our Fire Company" thereby making this book possible. As a Fire Company, we have always done our best for Crisfield and have time and time again made great personal sacrifices in order that we might perform our duty as firemen. Since our organization, we have been compelled to endure much criticism and have often been spoken of in a very light manner, but notwithstanding this, we have visited all fires promptly and always put forth our best efforts toward saving and protecting the property of our citizens and we feel sure that the results accomplished will bear us out in the statement that we have as good and as efficient Volunteer Fire Company as any city or town in the State.

Once more we wish to assure you of our appreciation of your efforts in our behalf, not only in compiling the "Firemen's Souvenir" but in all our past activities and sincerely trust that we may merit your continued confidence and help, always remembering that a strictly Volunteer Fire Company must have, not only financial help but the moral support of the entire community, in order that its members may always be encouraged and feel that their efforts are being appreciated by the public. In this way and in this way only will they be able to give their best.

## THE CRISFIELD VOLUNTEER FIRE COMPANY

TYPE OF ENGINE USED.

THE Crisfield Volunteer Fire Company is an organization any town should be proud of. Their "Motto" has always been "Our Deeds Our Reward" and on any and all occasions they have always lived up to their slogan.

About thirty-five years ago, a few public spirited citizens gathered in this city to organize a Fire Department for the protection of lives and property in and about Crisfield. This little band of men felt they were giving Crisfield something in the way of an asset to the town. In the thirty-five years of the existence of the Crisfield Fire Department the men comprising this organization have time and again proven their worth and proven to the satisfaction of all citizens that they are a real asset and worthy of commendation.

This Department has had wonderful growth. In the beginning, we simply had what is considered as a bucket brigade, later growing to a well organized Fire Company with a horse drawn, steam fire engine, and increasing and improving, until today, we have one of the best equipped and most up-to-date fire companies on the entire Eastern Shore Peninsula. Now we have well equipped hose houses, located in different sections of the town. Each has a fair supply of equipment manned by a quota of ever ready Strong and Steady Firemen. The central hose house, or Firemen's Home, has a new up to date La France Fire Truck, of the type illustrated above, with chemical attachments. This is said to be the latest and best fire fighting machine on the market and cost several thousand dollars and in a few months we expect to purchase another of the same make, only larger in size. This new equipment added to what the Company already has, will make this one of the best equipped Fire Departments on the entire Eastern Shore.

When the Crisfield Fire Company was first organized there were no telephones in the city neither was there any fire alarm, other than a small bell on the roof of the fire house, and when a fire broke out the person who discovered it was compelled to run to the fire house and ring this bell, after which a man on horse back would ride through the streets of the city blowing a horn and shouting fire, in an effort to arouse the citizens who would join with the fire company, form a bucket brigade and help to fight the fire. In those days water was drawn from either the river, cisterns or wells.

Later the steam fire engine, which is still in good working order, was purchased and did very good work, not only in protecting the property of the home folks, but on several occasions, being called to neighboring towns, not only did excellent work but, combined with the untiring work of our ever efficient fire company, was credited with saving some of these towns from complete destruction by fire, and if you care to visit our Firemen's Home, you will see engraved certificates of thanks, hanging on the walls.

Compare these conditions with the present system and note the improvement. We now not only have the equipment mentioned above, but in addition hundreds of feet of hose, numerous hose carts, hook and ladder outfits, a fine La France, chemically equipped, engine and a Fire Company of 33 members, all in active training and men of vast experience in fighting fire. Instead of the old system, the Consumers Ice Co., have attached a large fire alarm whistle and when that begins to blow the entire community knows that fire has broken out in the city. Another much needed innovation was the adoption, not long ago, of a complete code of fire alarm signals whereby immediately upon hearing the whistle you may know in just what part of the city fire has broken out.

The organization was never in better condition, both as to men and means of fighting fire. The officers are capable and efficient and all equipment is in good condition and the treasurer report shows a balance with no financial obligations. Crisfield should be proud of its Fire Company and its record for successfully fighting fires. The citizens should stand back of it, encourage it and always be ready to aid it financially, when called upon to do so. Remember the Crisfield Volunteer Fire Company works without hope of reward and as good citizens, never knock a fireman or his efforts to protect the property in which you have a financial interest.

## WHAT TO DO IN CASE OF FIRE

If the Fire is Just Starting, throw water upon the burning material---not at the blaze. One bucket of water will do more good if thrown on in handfuls instead of all at once. A small fire may be smothered with a rug or beaten out with a broom. Every house should contain a fire extinguisher. If this is within reach, use as directed.

If You Cannot Put it Out in A Minute, shout "Fire" (unless in a crowded room) and call the Fire Department or other help within call.

When You Go for Help, SHUT THE DOOR of the room with the fire. If doors and windows are closed the fire will get no fresh air and may burn itself out. In any case it will spread more slowly.

After help is called, save the most valuable things first. Don't lose your head and throw breakable things from the window.

If Awakened by fire, don't stop to dress. Wrap yourself in a blanket and get out the quickest way. SHUT EVERY DOOR YOU PASS THROUGH. Call for help and then try to locate the fire. You can then see if you need to save your goods.

If the Fire is on the First Floor, it is dangerous to go upstairs. Heat and smoke arise.

If A Room or Hall is Thick With Smoke, go through on your hands and knees. The smoke is thinnest near the floor. Hold a wet towel, a flannel cloth or even a coat collar over your mouth. This will help protect your lungs.

If Escape is Cut Off, close the door and transom, then open one window for fresh air and wait at the window, if the height is too great for a safe jump. This will show rescuers where to find you.

If Forced to Jump, throw out the bedding, mattress and all, and jump on that. It is safer to jump in a tree-top than to the ground.---Courtesy Royal Insurance Co. of New York.

## WHAT TO DO IN CASE OF BURNS and BRUISES

If the Clothing is on Fire---Lay the patient down, forcibly if necessary, with the flames uppermost. Extinguish the flames with a coat, rug, blanket or anything woolen that is at hand, holding one edge with your feet at the side of the patient's face and throwing the rest towards the feet to keep the flames from the face.

If the Burn is from Corrosive Fluids (such as concentrated lye, very strong ammonia, strong acids, etc.)--Soak the part in warm water, changing the water constantly to wash away the burning fluid. If the corrosive is known to be an alkali, pour vinegar in the water---Lye, Ammonia, etc. are alkalis. If it is an acid, put baking-soda or a little liquid ammonia in the water.

If the Face is Burned---Bathe with warm water, while preparing a mask. Take a piece of clean cloth, soft, old linen or cotton large enough to cover the face; cut holes for eyes, nose and mouth; smear with oil or ointment and fasten with strips around the head. If no oil can be had, dust the burn with a thick layer of flour, corn starch, boric acid, or baking-soda.

If the Throat is Scalded---Wrap the front sides of the entire neck with flannel wrung out in hot water. Give sips of cold water or bits of ice to suck. Keep the patient from draughts.

For Burns or Scalds Elsewhere on the Body---Cut clothing from injured part leaving on all that sticks to the burn; be careful not to break the blisters. Keep air from the burned part and, if possible, cover the burns with warm water (temperature of the body) containing baking-soda (not baking-powder). To soothe the pain use caron oil, olive oil, vasoline, cold cream, or a plaster of good clean laundry soap. To apply this dressing take strips of clean cloth or lint, six inches wide and long enough to go around the limb, soaked in the oil or spread with the plaster, lay on the burn, cover with a thick layer of cotton wool and bandage slightly.

In Case of Severe Bruises---Apply crushed ice in a towel, or ice cold water dressings, changed once a minute, or else cold water containing alcohol, left uncovered for evaporation. After the pain is eased, apply heat or any stimulating liniment to call the blood to the injured place.---Courtesy Royal Insurance Co., of New York.

## JUDGE OUR CLOTHES BY WHATEVER STANDARD YOU LIKE

They will stand the test. However hard you are to please---however critical your tastes---however exacting your demands, we are positively certain we can give you complete clothes satisfaction.

It makes no difference if you are irregular in figure---a little overweight---a little too tall or too short---you can be fitted here.

There are styles and models for young and old, in a variety of the newest novelties as well as the staple patterns.

Isaac Harris Sons, Philadelphia, Clothes for men and young men.

These suits give you more value in fabrics, in trimmings, in workmanship, in finish than the average suit made in the average way could ever hope to equal---or even hope to approach. These suits were made not merely to sell at the right prices---but to outsell any suits obtainable at these prices.

So diverse, so tempting is the array of garments we have assembled at these prices that we abandon hope of doing justice to them in this advertisement. We content ourselves with saying that, no matter what color, pattern, weave, weight or model you prefer, it is here. Sold exclusively by

Paint your Property with  
**STAG Semi-Paste PAINT**

You'll be surprised how bright and cheerful you can keep your home by occasionally painting it with a good durable paint. And the cost is very slight. Give us the dimensions of your house and let us show you how you can paint it at a very reasonable outlay for material and labor.

Against all other paints, we sell the Stag Paint as the best paint money and brains can produce.
